To

Colgate- Palmolive (India) Ltd.

We are extremely thankful to you & your staff for your kind support in helping us to bring about positive changes in the life of children infected & affected with HIV. With your support and Guidance tremendous positive changes have happened in the children's health, education & other skills.

We always feel proud to say that we have Colgate Palmolive (India) Ltd as a corporate partner in social development sector and today we are able to support 68 children and help in improving the Quality of their life.

" Positive Step "

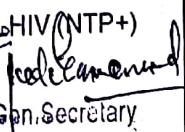

It is an Honor to state that our partnership is contributing towards the national responsibility & becoming the role model for other corporate sectors as well as staff.

We are also thankful to Colgate Company for starting the Mentorship Program for the senior children of the program to guide them in their path of Career development. In all 4 children were selected for the Mentorship Program.

NTP+ is highly thankful to the Colgate Palmolive (India) Ltd & its staff for actively participating & contributing their valuable time to bring effectiveness in Positive Step program

Thanking you

NTP+ is also thankful to Ms. Kshama Pradhan for her sponsorship to 3 children helping them to improve their Quality of life and Health.

Executive Summary

Colgate-Palmolive (India) Ltd. and Network in Thane by people living with HIV/AIDS(NTP+) has been supporting the education and monthly Nutrition of 68 children and Education of 4 children from Thane District through Sponsorship program "A Positive Step" since 2008. These children are either single or double orphan and are living with HIV since birth.

There are 4 students in primary (class 1-4), 40 in secondary (class 5-7), 8 in higher secondary (class 11-12), 8 are pursuing Degree and 1 child is doing professional course. 68 of them collect their monthly Nutrition kit from Network in Thane by PLHIV(NTP+) office at Kalyan every month and Education support is provided to these children along with other 2 HIV affected children.

Other than Nutrition and Education support Parents/Caretakers and Children's meetings conducted at NTP+ Office, help in the grooming and Capacity building of these children. Topics covered during the meetings include Carrier Guidance, Life Skill Education, Leadership Development, Preparation for Exams and Drawing competition with these children. Higher secondary children are provided with Career guidance through the Mentorship program, another initiative by the company to help the children to choose a carrier according to their skills and abilities.

During the year 2024-2025 Company Volunteer involvement and one to one Mentorship meetings could not be conducted. However, mentees were free to consult their mentors on call for information and Guidance regarding Career development.

This year World Aids day was celebrated with the children on 1st December at our Office at Kalyan. The children were very happy as they were provided with gifts to celebrate World Aids Day. World Aids Day was

Network In Thane by PLHIV (NTP+)

 President Treasurer Gen. Secretary

celebrated by providing gifts to the children. The children's wishes were fulfilled by their sponsors as per the wish tree provided by the children, a procedure followed by NTP+ and Colgate company every World Aids day.

Academics

Every child enrolled in the Positive Step program attends school either Public or Private for Education. These children come from poor families and many of them cannot afford education in Private or English medium schools. Due to Health-related issues they join schools near their area of residence. Their medium of education is usually Marathi or Hindi.

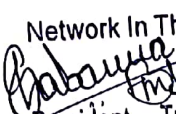

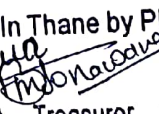

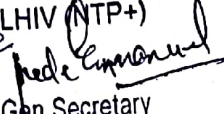

Monitoring Health.

As these children are born with HIV they face many health-related issues due to a weak immune system and need to monitor their health every month. These children have to follow strict treatment regime daily and have to meet their doctors at Government treatment centers every month for their monthly medicines. Their weight and height are checked on monthly basis. CD4 count is checked on half yearly basis and their viral load is checked on yearly basis. Apart from this if they have any opportunistic infections they are immediately put on medication and taken care of. Follow up of their treatment adherence and health progress is monitored by the Staff of NTP+ and by the doctors at the treatment centers during routine hospital visits by them. The nutrition support from Colgate company helps them to maintain good health and increase their immune system, preventing them from other opportunistic infections.

Internal Health Assessment

No Of Children	CD4 > 350	CD4 < 350	Viral Load > 1000	Viral Load < 1000
68	3	65	66	2

Network In Thane by PLHIV (NTP+)
 President
 Treasurer
 Gen. Secretary

Note: -CD4 count above 350 is good.

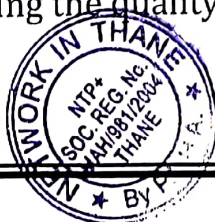

Viral load below 1000 is good.

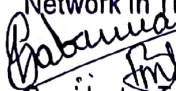

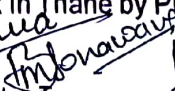

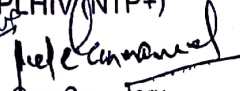

Education Updates

In the year 2024 Education Institutions for the children were started in June and the children were happy for schooling again and meet their friends and teachers. after the summer vacation. The chart below shows the number of children in different sections during the FY-2024-2025

Total No. of children-FY 2024-2025		68
Gender	Male	30
	Female	38
Standard status	Primary	4
	Secondary	47
	High Secondary	8
	Degree	8
	Masters	0
	Professional Course	1

Monthly Nutrition support to these children by the Colgate company under the "Positive Step" program has helped to increase the attendance of these children at school as this support helps in maintaining good health and keeping away Opportunistic infections due to HIV infection in these children. This helps in improving the quality of life of these children.

Case Study

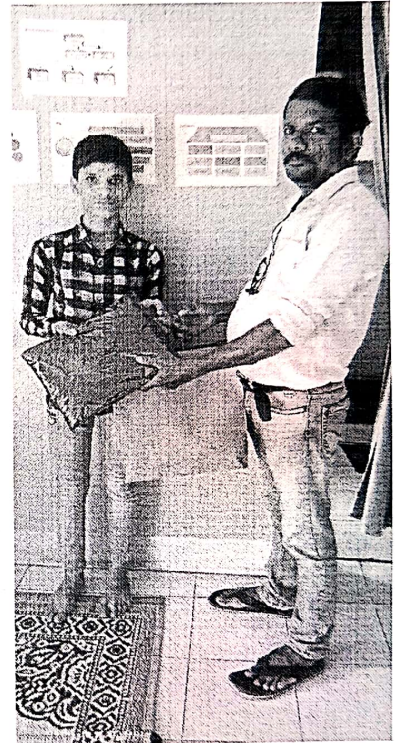

Pratik Salvi, a single orphan child, living with HIV since birth was introduced to the "Positive Step" program in 2015. He stayed with his aged mother and younger sister at Kolsewadi village of Kalyan Taluka. He grew up with Education from a nearby Private school. Before he joined the program it was very difficult for him to afford his school fees and was removed from school as his mother could not pay his school fees. He was in the 6th standard at the time of his enrollment in our program. He was put on Anti-Retroviral Treatment (ART) by the doctors at Rukminibai hospital, kalyan when he was infected with TB in the year 2015. During his treatment he was introduced to NTP+ by the Health Promoters of NTP+ at Kalyan ART center. After approval from Colgate company Pratik was introduced in the program for Education and Nutrition support. He was in the 6th standard then. With frequent follow up sessions and meetings at NTP+ office Pratik and his family gained the confidence to look forward in life and Adhere to their treatment. With regular support from Colgate Company and proper counseling sessions by NTP+ staff he was able to cope up with the fear of HIV infection and focused on his Education. This year he is in his final year of B.COM. Now he takes care of his aged mother and younger sister. He and his sister work part-time to support
